VITEC Strengthens Versatile Video and Digital Signage Solutions at ISE 2026

PARIS, France, 27 January 2026 - VITEC will return to ISE 2026 with a compelling line-up of software and hardware innovations designed to enhance IPTV, digital signage, and video wall workflows for professional AV, broadcast, corporate, and venue environments. This year's show marks a significant milestone for the company, as VITEC and Datapath exhibit side by side for the first time, following VITEC's recent acquisition of Datapath, a global leader in real-time video processing and control room solutions.

The integration of Datapath's advanced video wall controllers, AV-over-IP content distribution, and KVM control technologies with VITEC's award-winning IPTV and digital signage platforms creates a powerful, unified portfolio. This strategic move enables VITEC to deliver an even broader range of capabilities for mission-critical environments, creative installations, and enterprise applications. Datapath's product names and categories will remain within the VITEC portfolio, ensuring continuity for customers while enhancing support and development.

"We're entering an exciting new era for VITEC and our customers," says Colin Farquhar, SVP Sales, VITEC. "Bringing Datapath's renowned processing and control technologies together with our IPTV and digital signage platforms further strengthens our video expertise, allowing us to reach more markets and solve more complex challenges. At ISE we're keen to show partners exactly what this means for them, with clearer roadmaps, tighter integration and a stronger, end-to-end offering, backed by live demonstrations of our latest solutions."

On stand at ISE 2026, VITEC will spotlight the FX4 series of video wall controllers - compact, stand-alone 4K units with HDMI, DisplayPort, and SDI input/output options. FX4 enables the creation of visually stunning, ultra-high-quality video walls, with the flexibility to interconnect multiple units for larger, more complex configurations. VITEC's intuitive Wall Designer software allows users to select displays, map and adjust regions, preview layouts, and program all FX4 units via USB or network, streamlining setup and simplifying workflows for AV professionals.

VITEC solutions are deployed globally across corporate, broadcast, government, military, education, and hospitality sectors, now further strengthened by Datapath's expertise. As the first carbon-neutral MPEG company, VITEC continues to lead with sustainability initiatives, encouraging customers to 'buy GreenPEG' for ongoing environmental impact reduction.

About VITEC

VITEC is a market-leading provider of IPTV, Video Streaming and Digital Signage Solutions that help organizations harness the power of video to engage, empower and evolve. VITEC is a pioneer in the design and manufacture of hardware and software for video encoding,

decoding, transcoding, archiving and streaming over IP. Our end-to-end video streaming solutions enable customers to capture TV and video content directly from any source and manage its delivery, as channels or within digital signage screens, to any connected device via an existing network. From corporate, broadcast and venues, to accommodation, government and military, VITEC has global expertise in delivering complex, proAV solutions.

VITEC's award-winning IPTV platform is a powerful suite of services for content management, digital signage, video archiving, and video wall processing. Our encode/decode solutions are 100% hardware based, including PCIe cards with SDK for custom design or OEM for high-performance video systems.

Headquartered in Paris, France, we have a global reach through our offices across the Americas, Europe, Middle East, Africa and Asia Pacific.

Making a difference with green initiatives, VITEC is the first carbon-neutral MPEG company and encourages customers to 'buy GreenPEG' for continued environmental efforts to reduce greenhouse gases.
