ArtioView®

Engage and entertain your viewers with a cutting-edge interactive IPTV portal

Discover ArtioView, a fully customisable, interactive IPTV portal for a range of viewing environments, from hotels and cruise ships to student or workplace accommodation, stadium VIP suites, offices, hospitals or military camps. This premium solution is incredibly easy to use with its drag-and-drop portal creation tool, while offering an enhanced and intuitive infotainment experience.

ArtioView enables the creation of eye-catching, tailored interfaces for accessing not only TV or Video on Demand, but also requests or purchases such as room service, enabling the promotion of specific amenities and services.

ArtioView also fully integrates with hospitality Property Management Systems (PMS), allowing guests to book excursions, order a taxi, check their bill and more, at any point during their stay.
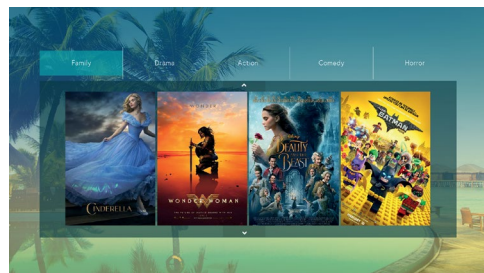

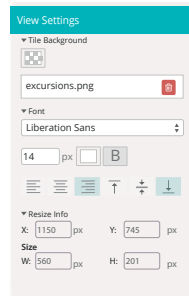

Create
visually-rich, fully customisable and interactive portals to enhance the viewer experience

Cutting-edge design

Our highly flexible interface offers countless possibilities, ensuring you can provide your viewers with an intuitive user interface that exceeds their expectations while promoting your services and driving additional revenue
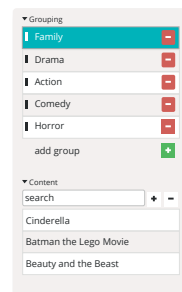

Tailored interface

Reinforce your image by tailoring the viewing interface to your brand. Each element in the portal can be easily customised and updated to reflect your identity. If you need assistance designing your perfect interface, do not hesitate to get in touch as we would love to help you

Customised welcome message

Add a personal touch by tailoring the welcome message viewers see on their TV

Drag. Drop. Done.

With our intuitive drag-and-drop interface, create and update portals quickly and easily. But if you need a helping hand, it's just a click away
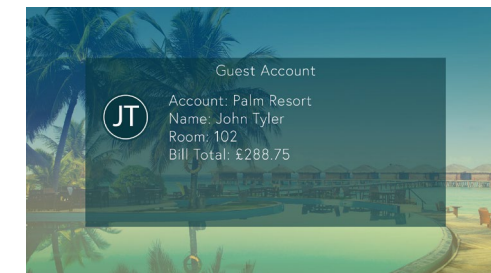

Language

Enable international viewers to select their preferred language for the interface

On-screen purchases

Easily add items that can be requested or booked, from excursions, spa treatments and room service, to team merchandise, VIP suite refreshments or booking a taxi

Live TV, catchup and video on demand

Keep your audience entertained by giving them access to a rich variety of local and international TV channels, latest movies and TV shows on demand. Access can be controlled (e.g., children can only see appropriate content) and encrypted video content is supported

Hotel PMS integration

In-room movie purchase and hotel check out are made easy thanks to our seamless hospitality PMS integration, which also enables paying guests to check their bill at any time

Deliver | a premium, personalised and interactive TV experience

Welcome video

Set up a channel that plays automatically on portal load, displaying information such as promotional videos, movie trailers to drive sales, or welcome messages

Video element

Make promotional or safety information easily accessible on the portal, by adding a video which plays full screen when selected by the user
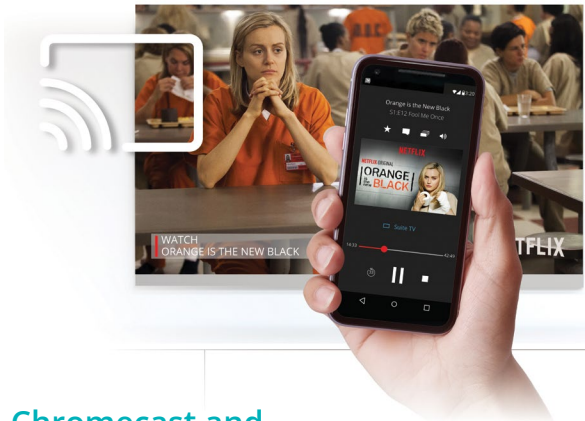

Fully customised experience

Personalise the type of portal viewers will see based on criteria such as loyalty programme level, or as part of a reward scheme, ensuring they enjoy a unique and fully customised experience. Choose which services they can access, such as premium TV channels, and create a tailored experience

Mailbox

Easily communicate with your audience: send them messages, information or promotions directly to their TV. Messages can be scheduled ahead of time to inform recipients about upcoming events or activities

Recording

Enable viewers to record their favourite programmes to watch later, directly through the EPG or using the recording app

RSS feed

Give viewers the opportunity to quickly access information and stay up to date with the latest news
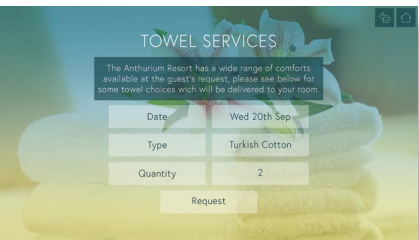

Services

Enable viewers to purchase room service, book excursions, or a taxi, order additional amenities and more from the convenience of their TV

Chromecast and screen sharing

Let viewers display images, videos and subscription content from their device directly on the in-room TV. Built-in Chromecast on Sony hospitality TVs is also supported

TV source

Allow viewers to easily switch source and access devices such as a games console or laptop, Apple TV, or any available app on a SmartTV (e.g., Netflix, YouTube and Spotify)

Information and promotions

Provide useful information and promote your amenities, services and activities

## Hotel guest request service

The Hotel Services app integrates with an Amadeus HotSOS Hotel Management System, enabling various guest request options, such as an extra pillow, to be accessible via the TV

Manage | Manage your end-to-end IP video system from one central location
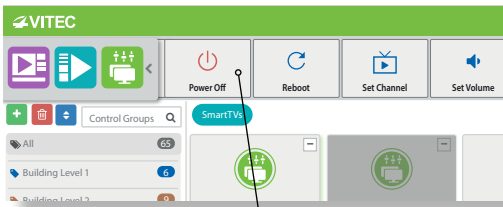

Smart Control

Smart Control brings control of VITEC end-points, as well as non-VITEC devices such as SmartTVs, into one central location

Mode switch

Easily switch between ArtioView, ArtioSign and Device Control

Groups

Create easily identifiable groups and publish different portals to specific screens or groups of screens, enabling you to personalise the viewer experience based on rooms, suites or other criteria

Device control

In this mode, choose an action or workflow and drag it onto a specific TV or group of TVs

Messages

Send pre-configured or instant messages and easily communicate important information to your audience.Each message can be sent to a single TV or groups of TVs, using the viewer's preferred language
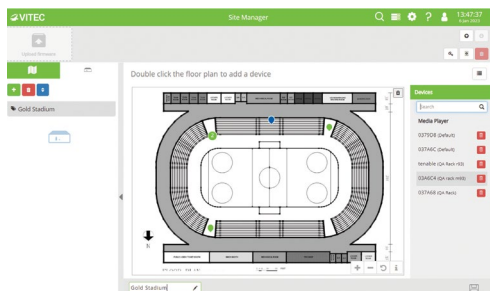

Search Tool

Easily find the ArtioView portal you're looking for

User permissions

Restrict user access and permissions to specific groups and easily control portal creation, editing and publishing. Users with the same profile can view and edit the same portals, making the creation process completely seamless

Device Location View

The Avedia Smart Control app introduces the ability to view all IPTV end-points, including media players and SmartTVs, in a new floorplan view. Users can upload a floorplan image of their venue and view all devices in situ. Particularly useful when on the move around a venue, building or campus, users can easily identify a device location on the floorplan and make changes to content, including digital signage, on the fly

WorkFlows

Easily create workflows by dragging actions such as power on, set volume, or channel change to create action sequences. ArtioView portals can be integrated into these workflows and published at the push of a button, or triggered when specific events occur. For instance, during emergency announcements, all screens could be automatically muted and updated to display evacuation plans, tailored to each floor and room. Priorities can be assigned to these triggers, ensuring that a lower priority message doesn't override something that requires immediate attention

Channels

Set up backup channels using the Channels app to ensure viewers enjoy a reliable and uninterrupted viewing experience in case of stream failure

High Availability

Provide an uninterrupted portal experience, by setting up a secondary server which will automatically take over if the primary server becomes unavailable. This means viewers will always be able to access their in-room TV portal and Videos on Demand

How ArtioView integrates with VITEC's Avedia end-to-end IPTV and digital signage platform

- **RF Gateway** — Channels | IP Streams
- **Encoders/Decoders** — Live Feed | IP Streams VOD | Recording
- **Avedia Server/VM with built-in apps**
- **LAN**
- **Media Players**
- **SmartTVs**
