

Design Services

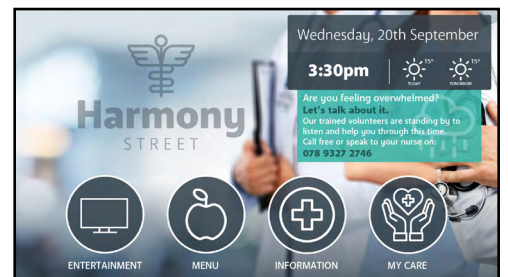

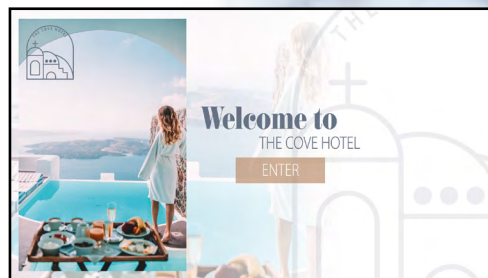

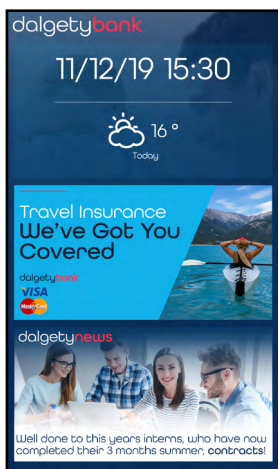

IPTV, Video Streaming & Digital Signage Solutions

Your digital signage and interactive IPTV portals, beautifully designed

Let us help you get started

VITEC's ArtioCreate software is intuitive and easy to use, but as with any design project, starting with a completely blank canvas can be daunting.

VITEC Design Services enable you to commission a set of customized signage templates or portal designs that will give you that step-up to creating well-designed, engaging signage screens or interactive IPTV portals you can use and build on going forward.

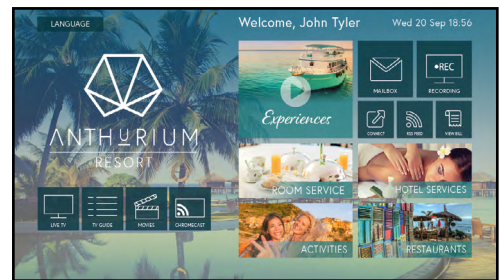

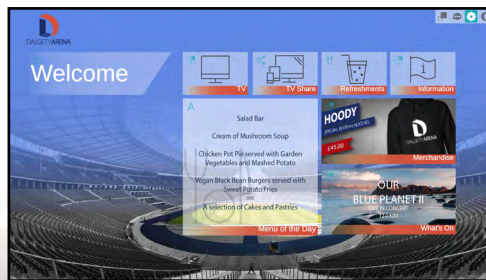

Digital Signage Design

If you're lacking the design expertise to turn something that's 'just okay' into a dynamic, impactful digital signage campaign that effectively communicates, educates or entertains with pizzazz, we can help. Whether you're a stadium, corporate office, hospital or hotel, we have lots of design examples to give you inspiration.

Interactive IPTV Portal Design

An intuitive IPTV portal which enables users to easily find their way around the services on their TV, while also driving additional revenue, can be of huge benefit to your business. We will work with you to create your unique, branded solution that combines great design with commercial drive.

A smooth design process from beginning to end

We start with a creative brief and discussion to full understand your requirements. From there we'll create some signage or portal designs to whet your appetite and help us refine everything to reach a final selection of signage templates and complete IPTV portal.
